# GREENOPS DIGITAL INFRASTRUCTURE AUDIT PACK

**Tenant Identity:** enterprise-logistics-uk | **Generated:** 2026-10-22 21:51:38 UTC | **Assurance Framework:** ISAE 3410 / ISO 14064-2 | **Ledger Security:** Ed25519 PKI Sealed

## 1. Executive Energy & Emissions Summary

| Metric | Value | Accounting Standard / Method |
|---|---|---|
| Total Workloads Processed | 5 | Batch Compute Executions |
| Total Energy Consumed | 0.70 kWh | Direct Hardware & Cluster Metering |
| Statutory Scope 2 Emissions | 0.08 kg CO2e | UK SECR (NESO AEF Location-based) |
| Consequential Carbon Displaced | 0.05 kg CO2e | Elexon BMRS Marginal Emissions Factor (MEF) |
| Estimated Spot Cost Savings | £0.03 | Wholesale Grid / Off-Peak Spot Shift Arbitrage |
| SLA Continuity Overrides | 0 (0.0%) | Zero-Downtime Pipeline Safety Invariant Active |

## 2. Non-Repudiable Settlement Ledger Blocks (Ed25519 Signed)

| Settlement Window (UTC) | Jobs | kWh | Merkle Root Hash | Ed25519 PKI Signature |
|---|---|---|---|---|
| 2026-10-22 22:51:38 | 5 | 100.00 | 53b9937d41ca5d1c... | pRfsZXiHvAEfxsp0... |

## 3. Statutory Methodology & Auditor Notes

**Statutory SECR Scope 2 Compliance:** Calculated using location-based Average Emissions Factors (AEF) published by NESO. Compliant with UK Companies Act 2006 Regulations 2018.
**Cryptographic Provenance:** All settlement blocks are aggregated into deterministic binary Merkle trees and signed with an Ed25519 private key. Auditor verification public keys are distributed out-of-band.
